Minimal again. I understand your position on HASP so I will defer to you on whether it is appropriate for anyone to comments on this.

Subject: TAPE comments (cont)

I think this will be the last email i send with TAPE related comments.

fig 3-2 should be amended to reflect updated soil sampling procedures (e.g, 30 point composites)

appendix b - soil sample sop should be updated to be consistent with comments provided in my previous email on soil sampling guidance

hasp - a few comments provided below but i recommend review by a qualified individual with industrial hygiene background. my comments are in green (at least on my computer) and occur mostly in the personal air sampling section.
